REFLECTION

This career talk revealed to us that jobs in Information Communication Technology are essential for industries as it will results in improving innovation, efficiency enhancement, and economic growth. For instance, the newly developed technologies contribute to improving people's life will lead to global connectivity where industries can expand their markets and collaborate with others. From the career talk, we learned that Information Communication Technology (ICT) is a vast industry. If we need to engage in an ICT-relevant job, personality traits play a huge role. As a student who is going to get involved in the ICT-relevant sector, it is a must to be a self-learner. This is because technology keeps changing rapidly and to stay up-to-date on technology trends, we need to develop new technologies by taking extra courses, doing research and so on. From the career talk, we also learned that there is a huge difference between work life and university life. During work life, we need to be responsible for every action that we do as it will have a huge effect on our colleagues. Overall, the talk gives a bunch of benefits for students where students can get a deeper understanding and information about the working requirements they need in the future.
